

# *Health Care for America Petition*

## The PRINCIPLES

President Obama has announced three bedrock requirements for real health care reform:

- **REDUCE COSTS** – Rising health care costs are crushing the budgets of governments, businesses, individuals, and families, and they must be brought under control
- **GUARANTEE CHOICE** – Every American must have the freedom to choose their plan and doctor – including the choice of a public insurance option
- **ENSURE AFFORDABLE CARE FOR ALL** – All Americans must have quality and affordable health care

**We, the citizens, support a public insurance option offered and administered nationwide that is available for everyone on day one.**

We support President Obama's three principles for real health care reform, and we call on Congress to enact a plan embracing the aforementioned additional conditions in 2009.
